Num	Name	Lab3.0	Lab3.1	Lab3.2	Lab3.3	Lab3.4	Grade	Hours
1	ARÓSTEGUI GARCÍA, ALBERTO	10	7	8	10	0	7.3	12.00 Testbench architecture? Why rf_transaction and rf_generator? Drivers receive transactions. CB description?
2	BARTOLI, MARCO	3	6	10	10	8	7.6	16.00 Pre-rel: you can do much more in 2hr. 1 test != 1 input vector. Matrix? I said not to use reg_0 as golden. Better CB description
3	DEGIMLI, DURU	3	5	5	0	0	3.0	14.00 Pre-rel: you can do much more in 2hr. Not finished (checker not connected, etc, ...)
4	EL BASLI EL KHATTABI, ISMAEL	-	-	-	-	-	NP	
5	HAGEN, DAN JOSHUA	10	10	6	10	7	8.2	12.00 Driver/monitor do not follow code explained in course. You are not using classes! Better CB description
6	KELZIYE, BASEL	5	7	10	10	5	7.7	14.00 Pre-rel: you can do more in 2hr. Verification plan can be more complete. Better CB description
7	KHAN, SHAFIULLAH	3	9	10	10	10	8.4	5.00 Pre-rel: you can do much more in 2hr. Test/s used for each feature?
8	MENEGHINI, QUENTIN	10	10	10	10	10	10.0	20.00 Wow! Gongrats!
9	MOLDOVEANU, ANDREI	5	10	10	10	10	9.0	24.00 Pre-rel: you can do more in 2hr. Top verification plan!!! Think on an implementation randomizing transactions
10	MORILLA SORLÍ, DAVID	7	-	-	-	-	1.4	
11	PATTARO ZONTA, LORENZO	7	-	-	-	-	1.4	
12	PLANA CODINA, JORDI	10	6	9	10	10	9.0	20.00 Verification plan does not follow structure (matrix? arch?). The DEFS are quite messy and hard to follow
13	RIOS LÓPEZ, ADRIÁN	10	8	10	10	10	9.7	6.00 A single test to approach all the matrix features is not the most optimal approach
14	ROMÁN GRACIA, INÉS	7	-	-	-	-	1.4	
15	RUBERT SÁNCHEZ, FERRAN	5	10	10	10	10	9.0	10.00 Pre-rel: you can do more in 2hr.
16	VIDAL SULÉ, GUILLERMO	10	10	7	10	10	9.0	16.00 Very AI generated testbench ...

Lab3.0	Pre-release	6.82	14.08
Lab3.1	Verification plan		5.63
Lab3.2	Testbench (+ How many tests? + Time?)		
Lab3.3	Pass/fail table		
Lab3.4	Clocking blocks
